Session 1 Classes

7:15 – 8:15 pm

Jefferson & Slavery

Mark Smith

The man who wrote "all men are created equal" owned slaves. The man who wrote some terribly racist things may have fathered children with one of his own slaves. This class will try to unravel the contradictions posed by Thomas Jefferson and slavery.

Poems about Family

Jill Donovan & Missy Simonds

A father making an egg for his young daughter, a grown man reflecting on his strained relationship with his father, a teenager folding sheets with his mother, a young child guiding his grandfather back home – each are moments captured in the poems we will explore in this session, poems that pay homage to the profound and messy beauty that is family life.

Blogging 101

Allégra Clément-Bayard

What are blogs? How are they used? How do I access them? How can I create one? This class is for anyone who has ever been interested in setting up and managing a blog for personal use. Find out how to begin the process using Blogger.com, and explore the possibilities, e.g., family blogs, travel/trip blogs, book club blogs, personal journal, etc. (Here's a link students and I developed when on a cultural trip to Paris: www.jbspca.blogspot.com.) Laptops will be available but feel free to bring your own (as long as it has wireless capability).

The Tea Totaler

Richard Sandler

Experience a tea-tasting of several batches selected from plantations spanning the globe. We will examine the history of tea-making, the various categories and types of preparation. Sample various Assams, Keemuns, Darjeelings, and a host of green teas as well as some of the best scones and shortbread to be found.

Make Your Own Photo Collage Poster

Margaret Bahe

Do you have multiple photographs that you would like to display in one neat package? Learn to use Adobe's Photoshop Elements to create a photo collage poster. We will crop your pictures, frame them in color, and organize them in your own unique combination for a lasting memory. Some experience working with digital photographs will be helpful. Bring your photos with you on a USB drive or experiment with samples provided.

Basics of Weight/Resistance Training

Kevin Kinney

Learn how to perform basic techniques safely and productively with barbells, dumbbells, body weight, medicine balls, stability balls and bands. A variety of movements will be shown that you can easily use at home or incorporate in your workout at the gym. The focus will be on learning the "how" and "why" rather than having a strenuous workout. The class will be appropriate for all fitness levels. Dress to participate or just to watch.

Session 11 Classes

8:30 – 9:30 pm

Presidential Elections

Mark Smith

This class will provide an overview of electoral rules, a history of contested elections, the proposals to alter the current system and a summary of the current state of the 2012 presidential election.

Reading Young Adult Literature: Discover Your Hidden Teen

Linda Mercer

Join the JBS library director in a discussion about what teenagers are reading these days along with the recent trend in which adults are devouring these titles as well. Where were you when you first read *Harry Potter*? Have you missed dinner while reading *The Hunger Games*? Are you re-reading *The Secret Garden*, *The Phantom Tollbooth*, the Narnia books or *The Outsiders*? Feel free to bring along a list of your favorites to share or discuss.

Google SketchUp

Brian Connor

Learn how to make a 3D drawing for visualizing your next project, whether it is a piece of furniture, a room renovation or an entire house. Google SketchUp is a free download that is fun, intuitive and provides instantaneous conceptual feedback of your designs. Add colors and textures to objects you have created. Learn how to download images of people and models of complex objects that will bring your drawings to life. If you know how to use a mouse, you can do this!

Teacher Pickers

Christopher Hinshaw & Alaine Peaslee-Hinshaw

Christopher, and his wife, Alaine, create one-of-a-kind art from re-purposed materials collected from salvage yards, steel manufacturing plants, farms and other nontraditional sources. Items are left alone as found art or combined and modified to create something original and new. Some pieces are made from reclaimed architectural components, such as large, ornate bird mansions and serve as functional art for the garden. Other objects become interior sculptures. This program features unique art pieces as well as photographs of Chris and Alaine's eclectic art and stories from their work and travels throughout the United States.

Facebook for Dummies Grownups

Jen Gosnell

Want to know more about Facebook, but afraid to ask your kids? Worried that you will be giving away too much information if you join Facebook? Do you have Facebook already, but have trouble keeping up with those perpetual changes to the design and security of the site? Come to this class and learn the ins and outs of Facebook; how to maximize your security, make sense of the wall, block those annoying posts you may be getting, and make it a useful (and fun) part of your online life!

Wind Down Yoga

Ellie DesPrez

By definition, yoga balances effort and ease. Our evening practice will focus mostly on relaxing through a variety of stretches and restorative poses. Beginners are welcome, as are experienced yoga practitioners. Wear nonbinding clothes.

Double Session Classes

7:15 – 9:30 pm

Mudslinging

Andy Denney

In this class, you'll learn two different ways to throw pottery – how to throw like a machine and how to throw like a child. The hope is to combine both methods so that you can create your very own masterpiece with the most important quality: the human one. The class will cover basic skills associated with throwing vessels on the wheel, including wedging, centering, drawing up clay, forming a bowl and trimming.

Last Call

Bob Henningsen & Jim Lowe

Our resident sommelier in the English Department and long-time co-teacher of this class, Bob Henningsen, will retire at the end of this year. It is only fitting that this class, his swan-song of sipping, be dedicated to some of his reasonably priced personal favorites, regardless of provenance, vintage or variety. Those enrolled in the class will be invited to participate in the creation and consumption of hand-crafted pizza as a complement to the wines we sample.

Getting into the Swing of Things

Ellen Port

One of the top-ranked amateurs in the U.S., Ellen Port, is back for the 15th time! Receive basic instruction in the fundamentals of the golf swing. Participants need to bring a putter, a mid-iron and a wedge.

Home and Automobile 101

Tim Baker

How much knob and tube could a woodchuck chuck if a woodchuck could chuck knob and tube? What does HVAC stand for? Learn the basics of home and automobile maintenance and you will develop a deeper understanding of the various systems in each and how to troubleshoot problems should they arise – or prevent them from ever happening!
